

WHEREAS; the thyroid is a gland in the human body that is responsible for releasing the hormones triiodothyronine (T3) and thyroxine (T4), which control many of the body's metabolic activities, such as heart rate and the transformation of food into energy; and

WHEREAS; thyroid disease occurs when the thyroid works improperly, generally resulting in hormonal production being too low or too high, which impacts the body's ability to regulate its metabolism; and

WHEREAS; thyroid disease encompasses a number of conditions, including goiter, hyperthyroidism, hypothyroidism, thyroid cancer, thyroid nodules, and thyroiditis, among other conditions; and

WHEREAS; approximately 20 million Americans have some form of thyroid condition, and while thyroid disease can affect anyone regardless of gender, race, or age, women—and older women, especially—as well as individuals with a family history of thyroid disease, individuals who have been treated for thyroid conditions in the past, and individuals taking certain medications are at a higher risk; and

WHEREAS; once diagnosed, thyroid disease is often manageable and can be treated with medication, surgery, or other medical procedures; and

WHEREAS; this month, the state of Wisconsin joins medical professionals across the state in raising awareness of the signs and symptoms of thyroid disease and in encouraging all Wisconsinites to recognize the importance of thyroid health;

NOW, THEREFORE, I, Tony Evers, Governor of the State of Wisconsin,
do hereby proclaim January 2023 as

NATIONAL THYROID MONTH

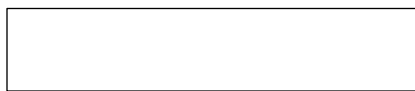

throughout the State of Wisconsin and I commend this observance
to all our state's residents.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused the Great Seal of the State of Wisconsin to be affixed. Done at the Capitol in the City of Madison this 28th day of December 2022.

TONY EVERS, Governor

By the Governor:

DOUGLAS LA FOLLETTE, Secretary of State
