

WHEREAS; it has become increasingly evident that pollution and climate change present a grave threat to the health, safety, and economic well-being of all Wisconsinites, and exacerbate existing threats to lower income communities and communities of color; and

WHEREAS; our state has a responsibility to current and future generations to act to prevent further damage to our climate and to invest in sustainable solutions, including the use of clean energy alternatives; and

WHEREAS; with the signing of Executive Order 38 in 2019, the state of Wisconsin established a goal of transitioning to 100 percent clean energy consumption by the year 2050, to be achieved primarily through the utilization of solar, wind, hydro, biomass, and biogas sources, as well as by developing support from technologies such as energy storage; and

WHEREAS; Wisconsin has also committed to fulfilling the carbon reduction goals of the 2015 Paris Climate Accord, which extends beyond electricity sector carbon emissions to include all forms of carbon emissions; and

WHEREAS; while Wisconsin's transportation sector consumes nearly a quarter of our state's total energy use, and petroleum costs taxpayers approximately \$11.8 billion per year, these economic and ecologic burdens to our state can be dramatically alleviated by utilizing energy from more cost-effective, locally produced clean electricity and fuels; and

WHEREAS; over the past decade, the price of wind and solar energy have steadily declined, making them both less expensive alternatives to coal-generated electricity, which costs our state's taxpayers over \$650 million per year; and

WHEREAS; the clean energy sector currently supports over 69,000 jobs in Wisconsin, and positions like solar installer and wind turbine technician lead the way as two of the fastest growing jobs nationwide; and

WHEREAS; due to their on-site nature, many clean energy jobs are inherently local, cannot be outsourced, and are critical to the growth of our local economies; and

WHEREAS; transitioning to clean energy can provide economic prosperity and vitality to more communities across our state, especially those that have been disproportionately impacted by climate change, those that lack economic security, and those currently relying on the fossil fuel industry for their livelihoods; and

WHEREAS; this week, the state of Wisconsin encourages increased organizational and individual support of innovative and sustainable solutions that address the economic and energy needs of our state and our country, and joins municipalities and individuals across Wisconsin in working to implement the cleanest and lowest-emitting energy technologies available;

NOW, THEREFORE, I, Tony Evers, Governor of the State of Wisconsin,  
do hereby proclaim September 20 through 24, 2021, as

## **NATIONAL CLEAN ENERGY WEEK**

throughout the State of Wisconsin and I commend this observance  
to all our state's residents.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused the Great Seal of the State of Wisconsin to be affixed. Done at the Capitol in the City of Madison this 7<sup>th</sup> day of September 2021.

TONY EVERS, Governor

By the Governor:

DOUGLAS LA FOLLETTE, Secretary of State
